Does Omnisphere 2 Work On FI 10

FL Studio is connecting the midi connection between omnisphere and the DAW itself. 3) Hit the 'Connect' button after this and copy the code it generates in the lower, big text box. Load an instance of Omnisphere 2 and it will give you a Challenge Code Hit the button 'Copy' near the Challenge Code text. Just can't get a sound out of Omnisphere 2 in FL Studio, the volume meter won't even rise. 2) Paste the code into K2M Tools smaller text box, located above the three buttons.

It is ridiculous how this problem is like a plague from multiple users across the internet and nothing for a fix.
